# Types Of Business Enterprises

## Sole Proprietorship

A business structure owned and operated by a single individual who assumes all risks and rewards. This model offers complete control and simplified operations while maintaining direct responsibility for all business decisions and outcomes.

## Partnership

A collaborative business arrangement where two or more individuals share ownership, responsibilities, and profits. Partners combine their expertise, resources, and capital to achieve common business objectives through mutual agreement.

## Corporation

A legal entity separate from its owners, offering limited liability protection and the ability to raise capital through stock issuance. Corporations provide structured governance and perpetual existence independent of ownership changes.

# Business Models

Business models define how organizations create, deliver, and capture value in the marketplace. They encompass revenue streams, customer segments, and operational strategies that drive sustainable growth and competitive advantage.
